

JUST THE JOB

It's a bit Arty Farty

MADE WITH + POSITIVITY

A little bit about us

THE ARTS AND ACTIVITIES TEAM

The arts team have developed an innovative project to enable our team members to explore their creative talents. The result is a range of uniquely personal and original designs.

Where do we sell

We showcase our products at events like our annual summer open day and coffee mornings at Just the Job. Recently, we have begun supplying local businesses with some of our items for resale. Looking ahead, our aim is to expand our presence at festivals and other events.

The excitement of this project is that we never know what we are going to find to transform into something new. This continues to challenge our team members cognitive approach to design.

Recycle

Our focus is on creating items from recycled materials, contributing to environmental sustainability. We embrace our creativity to transform discarded household items into desirable products.

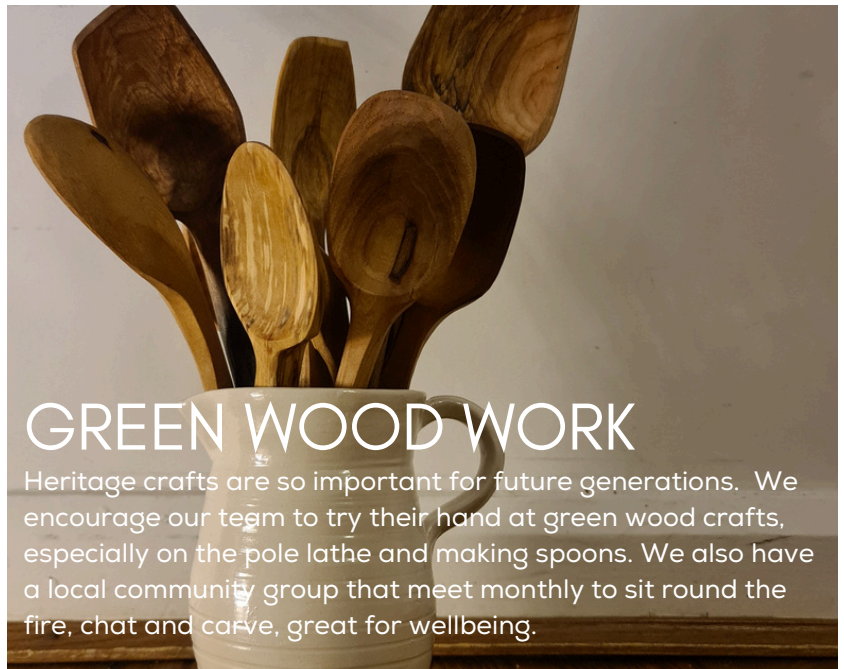

Another person's
Treasure...

VERSATILITY

GREEN WOOD WORK

Heritage crafts are so important for future generations. We encourage our team to try their hand at green wood crafts, especially on the pole lathe and making spoons. We also have a local community group that meet monthly to sit round the fire, chat and carve, great for wellbeing.

Making wreaths from materials found in the hedgerow is a lovely and environmentally friendly method to appreciate the beauty of nature.

DT RESTORATION

In memory of Dan who passed away in 2024 aged 33.

Dan joined Just the Job about 12 years ago. Always keen to be outside gardening or processing firewood he was one of the grafters, a go to digger. Periods of illness slowed him down at times, but he was always keen to be back at it and getting Dan to rest and take it easy was always harder than getting him out to work.

Dan eventually though had to slow down and more recently found a passion for restoring old tools, small pieces of furniture and going to car boot sales and charity shops to find his treasure.

He won a few awards at the Wensleydale Show and with Just the Job had started a little enterprise "DT Restoration".

Just the Job and Dan's parents are going to continue with DT Restoration in memory of Dan, helping to keep our family strong and growing into the future.

Spoons made by Verena Clouston

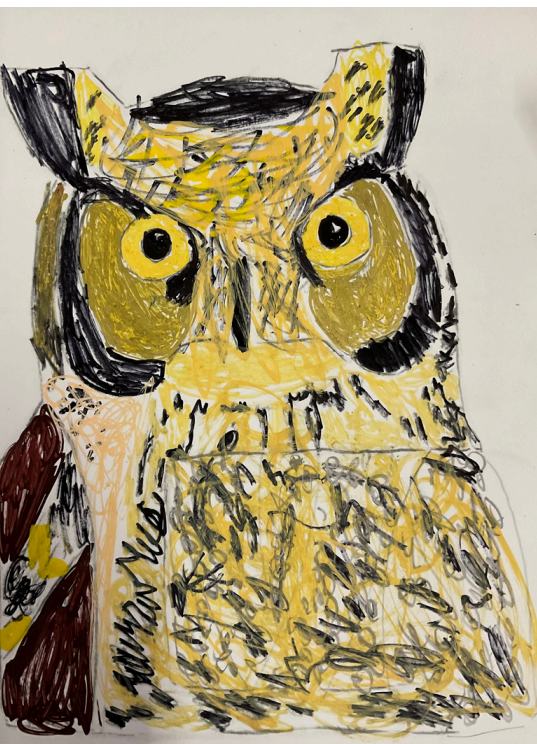

Tufting

Interesting and vibrant designs are transformed into tactile cushions, rugs and chair covers.

ART

TEXTILES

The team really enjoy exploring different materials to create art, from felting to recycling second hand jackets.

Quirk[@]✓_T✓

This is Nicole

Nicole is the arts and activities coordinator at Just the Job and being an artist herself, she is dedicated to nurturing and enhancing the artistic talents of our team members. This has led to Nicole and the team developing our very own brand Quirk@jtj.

We are not just a pretty place ...

Just the Job is lucky to have a team of volunteers that work along side the arts and activities co-ordinator

Our volunteers bring a skill set to our daily activities along with supporting and inspiring our work team members.

WORK SPACE

The arts and activities team currently work from a large industrial workshop with a cosy log burner. They regularly venture out for nature walks and wander to our horticultural site. They enjoy a visit to local charity shops to find the next bargain to be transformed, ready to sell at our Summer Open Day and Coffee Mornings.

Looking to the future...

Just the Job is currently developing a new eco-friendly building. This project includes an inspiring workspace that will foster even greater creativity among the team.
